## SONUUS WAHOO

Killer analog wah and more with a step

The Sonuus Wahoo produces classic analog effects with all the benefits of digital technology. If you've been looking for a single pedal that produces killer wah and filter effects, your search ends here. The Wahoo allows you to deep edit, store and share presets—and features 100 factory presets that sound great out of the box. You can also store up to 100 user presets that can be created and edited on the fly or via the ultra-hip deep-editing app (Mac and PC compliant). Ruggedly built, the pedal action is as smooth as the sounds are thick.
