## GIBSON'S BILL KELLIHER GOLDEN AXE EXPLORER MASTODON-SIZED POWER

Tapping the mojo of one of metal's ace shredders, **Gibson's Bill Kelliher Golden Axe Explorer** delivers tone in mammoth proportion. This six-string beast features a solid mahogany build for massive sustain and low-end warmth. A departure for Gibson, and the Mastodon guitarist himself, this guitar offers a pair of LACE Nitro Hemi pickups, which dish out epic high-gain tones with either humbucking growl or single-coil bite. With its unique Go-Gold burst finish, this unique Explorer is sure to turn heads.
