

## TOP GEAR

## PREAMP WITH LEGACY

Lots of gear claim to have some connection to the Neve legacy, but the 511 mic pre is one of the few 500 Series modules designed by Rupert Neve himself. Naturally clear and transparent, the **Rupert Neve Designs 511** is an excellent match for any sound source. There's the Portico 5012's sweepable high-pass filter onboard, and when it's time to kick in that timeless Neve mojo, just turn up the Silk/Texture circuit—from the noted Portico II—and bask in delightfully smooth warmth.

—Phil Selman

**‘Naturally clear and transparent, the Rupert Neve Designs 511 is an excellent match for any sound source.’**
