## SONY SOUND FORGE PRO 11

Next generation of editing and mastering

Sound Forge Pro 11—Sony's latest version of their flagship recording application—offers a full step up for those who create, edit or mix in Windows. The workflow is nothing short of phenomenal. In-application tutorials do a sensational job of walking you through frequently used menus and windows. The massive time display and input meters allows tracking without having to sit in front of the computer monitor. Utilizing the full power of nondestructive editing, the Playlist Window enables users to audition alternate arrangements on the fly, and the Plug-in Manager further speeds production by offering the ability to create and edit effects signal chains. And if you need to burn a CD of your final mixes, the Track List window makes disc production a breeze.
