PRISTINE ACCURACY

KRK's Rokit series has been dominating the market for several years, so when the new third-generation G3 studio monitors were recently announced, the recording world took notice. Available with 5", 6" or 8" woofers, a redesigned 1" soft-dome tweeter, and a newly designed Class A/B bi-amplification system, Rokit studio monitors offer massive headroom with minimal noise or distortion. A contoured round-edged front baffle provides enhanced stereo imaging while widening up the sweet spot, and a new signal peak limiter protects against sudden excessive spikes.
