HAMMER ACTION TO GO

In the past, the very notion of a light, portable keyboard workstation with weighted hammer action keys would have been unheard of. Enter the **Korg KROSS** workstation, which comes loaded with a 16-track sequencer, an arpeggiator, and an Electribe-derived

step sequencer—in addition to their Natural Weighted Hammer Action keyboard. There are hundreds of

bread-and-butter Korg sounds onboard and more than 130 EDS-i effects to play with. Best of all, even the larger 88-key KROSS workstation weighs less than 28 pounds and can run for hours on AA batteries.
