

Special Gear Feature

FOR THE MODERN MUSICIAN

Anyone looking to combine old-school electronic beat creation with contemporary DAW-style music production will appreciate the **Akai Professional MPC Element**. Its slim aluminum body is just big enough for a set of 16 pressure-sensitive pads and performance controls, saving precious desktop

space without scrimping on features. On the software side, the MPC Element comes with Akai's powerful MPC Essentials software, a DAW-style music production environment that blurs the line between traditional MPC workflow and modern DAW-based sequencing.

'Anyone looking to combine old-school electronic beat creation with contemporary DAW-style music production will appreciate the Akai Professional MPC Element.'
