

Special Gear Feature

FOR THE ICONIC INSPIRED

Originally introduced in 1981, Gibson produced the Flying V Bass in a limited run of just 375 instruments. For years, these iconically shaped rarities have been sought far and wide by collectors and performers. Enter the **Epiphone Korina Flying V Bass**, which offers everyone a chance to play one of these hard-hitting basses. Highlights include a warmly resonant korina body, an extremely playable SlimTaper mahogany neck, and a set of two thumping humbuckers with independent volume controls.
