

Special Gear Feature

FOR THE APP HAPPY

IK Multimedia's iRig BlueBoard provides a simple yet sophisticated solution for musicians looking for wireless control over their favorite music apps. Designed to integrate seamlessly with Macs and iOS devices, the battery-powered iRig BlueBoard sends control messages via Bluetooth, providing remote access to presets, parameters and functions in nearly any MIDI-controllable software. TRS jacks offer connections for standard expression pedals, opening possibilities for advanced setups. Plus, the iRig BlueBoard is small enough to ride along in a gig bag or laptop case.
