EARTHQUAKER DEVICES THE DEPTHS

New and improved vintage effects

The Depths by EarthQuaker Devices is a modern take on the Uni-Vibe, a modulation effect most famously heard by early pioneers like Jimi Hendrix, David Gilmour and Robin Trower. With the addition of its Voice and Throb controls, The Depths provides a far greater tonal range than the original Uni-Vibe, without sacrificing its characteristic flavor. And with an 18-volt power supply connected (rather than a standard 9-volt), The Depths delivers almost endless headroom for extra clarity and sparkle.
