

TOP GEAR

BUILT FOR JAZZ

Fat, clear and buttery, the **Rivera Jazz Suprema** tube amp offers archtop players everything they could ask for in a 50-watt, 1x15" combo. A pair of EL-34 tubes provides positively stunning headroom and plenty of clean gain that glows when pushed. A large selection of front-panel controls makes it easy to dial in an expansive range of tone, making the Jazz Suprema a superior session amp. Plus, there's a lush Accutronics three-spring reverb onboard that serves up long, vibrant decay.
