NS DESIGN CR SERIES OMNI BASS

Perfect bridge between electric and upright

Built for bass players who need a single portable instrument for a range of playing styles, the NS Design CR Series Omni Bass is simply a blast to play. To go with its minimalist shape, the Omni comes with a Boomerang Strap, which makes it comfortable to play the instrument either in an upright or electric bass posture. The combination set of custom EMG magnetic pickups and dual mode Polar pickup system electronics also provides an impressive range of tone and expression.
