D'ADDARIO NYXL STRINGS

Louder, stronger and in tune

For many guitarists, the hunt for the perfect set of strings will come to an end with the D'Addario NYXL line. Employing a unique formula of nickel-plated steel, the NYXLs feature a high-carbon steel alloy core with remarkable properties allowing them to be tuned quickly, and stay in tune. Even after a week of abusive testing, these strings felt like new and sounded great. What's more, their pronounced midrange boost adds a healthy dose of extra presence and crunch.
