

TOP GEAR

FOCAL HERO

In the world of pro music production, the name **Focal** is virtually synonymous with quality monitoring. Focal's new **Alpha** series delivers that high standard with active studio monitors set at a price point that's perfect for serious home-studio engineers. Offered in three woofer sizes—5 inches, 6 1/2 inches and 8 inches—each model includes a 1-inch inverted dome tweeter that provides smooth and accurate high-end reproduction. MDF enclosures with front porting extend and balance low frequencies resulting in critically accurate monitoring without the need for a subwoofer.
