ORANGE AMPLIFIERS TH30

The latest colorful offering from a noted amp company.

FOR: Those who want a modern take on classic British tone. Since the first models hit the stage with Fleetwood Mac in the late 1960s, Orange has been delivering classic UK tones to rock fans the world over. It is the latest in a tradition of amps that sound as cool as they look. The TH30 is outfitted with a pair of EL34 output tubes, twin channels and an effects loop. We found the jangly clean tones nearly as exciting as the thunderous dirty channel. The combo comes equipped with a Celestion G12H that begs you to crank up.

NOT FOR: Disco tribute bands.
