SEYMOUR DUNCAN DEJA VU TAP DELAY

Tap tempo delay with bucket brigade tone

FOR: Button pushers. Over the past several years, veteran pickup manufacturer Seymour Duncan has been rolling out an impressive line of boutique-flavored guitar effects. The Deja Vu Tap Delay blends a bevy of modern features with analog bucket brigade circuitry to create a pedal that has something for just about every delay fanatic. The D/A Blend control allows you to dial in just the right amount of the analog ambience into the delay signal—especially nifty when matching the tone delay to the amp tone. Features like tap tempo and a 20 second looper offer control and delay times the pedals of yesteryear couldn't imagine.

NOT FOR: Plug-in fanatics.
