KYSER KLAASSICS QUICK-CHANGE PARTIAL CAPOS

Change your tune

FOR: Altered tunings without drama. From Black Mountain Side to Brown Sugar, altered tunings have inspired generations of both acoustic and electric guitarists. Each of the four Kyser Classics Partial Capos allows you to get those classic sounds without the hassle of retuning your instrument. Partial capos are designed to be placed at specific locations on the neck where they allow a blend of capo'd and

open strings to ring, creating altered tunings in the process. In combination with a traditional capo, you can also transpose these tunings farther up the neck—something your vocalist will appreciate.

NOT FOR: Standard-tuning zealots.
