

COLD DAYS HOT SOUNDS

The latest gotta-have-it gear and instruments to help you make 2012 your best musical year ever

By Mitch Gallagher

SAMSON METEOR MIC

Sometimes you just need a mic you can grab quickly and set up before the muse escapes. But why not capture those ideas and tracks with the highest quality you can muster in a moment? Enter the Samson Meteor. This large-diaphragm USB microphone plugs straight into your computer, and even has a cool-looking three-legged tabletop stand built right in. Plus it has a headphone output with volume control so you can monitor clearly for great overdubs.

‘This large-diaphragm USB microphone plugs straight into your computer, and even has a cool-looking three-legged tabletop stand built right in.’
