STRING SWING CC01K & CC06 GUITAR HANGERS**Hang 'em high**

FOR: Guitar stowage. For the past 25 years the folks at String Swing have been in the business of keeping instruments safe and sound. The wooden base plate of the CC01K mounts flush to your wall with the included screws and plastic toggles, insuring your guitar doesn't make an unplanned stage dive. And if you're taking your show on the road (or just to rehearsal), the cast-metal frame on the CC06 wraps around the handle of most 4x12 cabinets to keep your instruments safe and out of the way. Both guitar hangers come with plastic tips and deep rubber-coated narrow-fit cradles, preventing direct contact with any metal surfaces that could scathe your prized instrument.

NOT FOR: That lived-in, distressed look.
