**DYNAUDIO DBM50: BIG SOUND ON YOUR DESKTOP**

There are relatively few studio monitors designed for desktop use, and fewer still that are affordable. Enter the **Dynaudio DBM50**, which offers superior sound and a compact footprint. The DBM50 adds a slight upward tilt to the brand's already popular near-field studio monitor design, making the pair ideal for desktop use. They provide a huge sweet spot for monitoring, and when combined with a decoupler such as a set of Auralex MoPADs, DBM50s offer vital monitoring accuracy without taking up precious studio space.
