EARASERS EARPLUGS

Affordable, comfortable hi-fi earplugs

Musicians want to protect their hearing but they hate the sound, feel and appearance of over-the-counter earplugs. Custom-molded models address these objections but they require professional fitting and are pricey. **EARasers**—a company founded by musicians—is dedicated to creating comfortable, attractive, accurate and affordable earplugs. Since their arrival at 2012's summer NAMM show, EARasers have been a massive success.

These transparent plugs are available in three sizes for hours of noise reduction that stays true to your sound.
